ABOUT MYSELF

Motivated Software Engineer with years of professional experience in the development industry. Specialized in Android development using Kotlin and Java, I have successfully delivered robust and high-performing applications in agile environments. Recognized for my attention to detail, organization, and work ethic, I am keen to leverage my skills in a new Software Engineer role. Additionally, I am eager to broaden my expertise into iOS development. I am fluent in English and can also speak French and German. I am also open for relocation.

EXPERIENCE

CME OFFSHORE SAL | ANDROID SOFTWARE ENGINEER

December 2018 – present

- Demonstrated expertise in writing reusable and efficient code, following best practices and design patterns
- Engineered and maintained Android features using Kotlin and Java
- Collaborated with cross-functional teams to design robust solutions meeting client functionality, scalability, and performance requirements
- Meeting project needs and delivering assigned tasks in a clear and timely manner
- Mentoring new teammates and bringing them up to speed with the dynamics of the team and project
- Researched and implemented new technologies to maximize development efficiency
- Worked in an Agile software development environment
- Employed scrum methodologies for efficient project progress and timely delivery
- Reviewed project specifications to design technology solutions exceeding performance expectations
- Prioritized UI and UX creation using Compose and in constant communication with designers
- Integrated external libraries and APIs for diverse functions
- Operated with hardware and embedded devices running Android
- Assisted in code review and merge request processes
- Managed code with version control systems
- Documented features and project progress using Confluence

VISTORY | ANDROID SOFTWARE ENGINEER

July 2018 – Nov 2018

- Implemented customer requirements while maintaining constant communication with them
- Demonstrated keen attention to detail in UI/UX implementation
- Tracked tasks and project progress using JIRA
- Wrote project documentation using Confluence
- Participated in a dynamic agile environment

PUBLICATIONS

AUTOMATED ANONYMIZATION OF PAROLE HEARING TRANSCRIPTS | UNIVERSITÄT PASSAU

November 2024

The case of parole hearing transcripts from hearings in California is illustrated with a multi-tool approach to extract sensitive information from the spoken legal dataset and anonymize them while preserving the structural integrity of the transcripts.
